EDUCATION

New Jersey Institute of Technology, Albert Dorman Honors College

Newark, NJ

B.S. in Computer Science | Minor in Applied Mathematics

Expected Graduation Date: May 2028

• GPA: 3.78 | Dean's List: All Semesters

TECHNICAL SKILLS

Programming Languages: Python | Java | JavaScript | TypeScript | SQL | HTML/CSS | C++ | C

Frameworks & Libraries: React.js | Node.js | Flask | TensorFlow | scikit-learn | Pandas | NumPy | Selenium | Tailwind CSS

Developer Tools: Git | GitHub | VS Code | Jupyter Notebook | Google Colab | Anaconda | Postman | Jira | Confluence | Binder

Platforms & Databases: Linux | AWS | MongoDB Atlas | PostgreSQL | MySQL | SQLite | Vercel | WebSockets

EXPERIENCE

Fiserv - Commerce Hub Automation Team

Jun 2026 – Aug 2026

Software Engineering Intern

Berkeley Heights, NJ

- Engineered a **3-agent AI system** using **Java, Selenium, Cucumber, and LLMs** to automate Commerce Hub product onboarding QA, reducing up to **3 hours** of manual test-case creation and framework analysis.
- Built **Test Case** and **Product Boarding Agents** integrating **Jira, Confluence, Zephyr, and Fiserv Dev Studio** to generate **5 test-case categories**, analyze existing automation code, and automatically add or update product frameworks.
- Developed a **Master Agent** for test generation and scenario classification, plus a **user-friendly UI** for nontechnical QA users.

Arkra - Data Pipelines & Market Intelligence

Oct 2025 – Mar 2026

Software Engineering Intern

Newport Beach, CA

- Built Python web scraper for SEC EDGAR filings using **Playwright + LLM extraction**, automating 10-K/10-Q retrieval and cutting manual collection time by **84%**
- Designed **OpenAI-powered filtering pipeline** to validate and structure metadata before uploading to **AWS S3**, improving data cleanliness and retrieval speed by **53%**

NJIT Ying Wu College of Computing

Jun 2025 – Jan 2026

AI/ML Research Assistant

Newark, NJ

- Selected as **1 of 2** undergraduate researchers to contribute to Professor James Wang's **AI/ML-driven solar physics** research, executing and validating **15+** machine learning workflows using **NASA/SDO** datasets, GitHub, and Binder environments.
- Co-developed a **Random Forest-based Solar Activity Classifier** using **6+** Python libraries to classify solar activity into **3** risk levels from **5+** solar features, achieving **78%** classification accuracy.

NJIT Learning Committee

Jun 2025 – Present

Technical Peer Mentor

Newark, NJ

- Coached **15+ first-year CS students** in Java, Python, and debugging; improved project completion rates by **30%**
- Organized **3 campus-wide technical events** including hackathon prep workshops, boosting student participation by **40%**

PROJECTS

Recova – AI PT Coach | *React, Flask, SQLite, MediaPipe, Claude Haiku* | **1st Place – NJIT Claude Builder Hackathon**

- Used **MediaPipe** pose estimation to track knee and hip angles in real-time, triggering **Claude Haiku** to deliver instant corrective feedback and personalized post-session summaries
- Built **Flask REST API + SQLite** backend to store patient records, session data, and progress through a clinician dashboard

Prooffly – Developer Portfolio Analyzer | *TypeScript, React, Node.js, Express, GitHub REST API*

- Built a **GitHub portfolio intelligence platform** that analyzes source code, README content, and repository metadata to uncover technical skills and generate career-specific scores
- Engineered a **static-analysis and authorship-verification pipeline** that verifies fork contributions, traces findings to exact code, and analyzes up to **220 KB** of source per project

FareFlow – Personalized Transit Intelligence | *React, TypeScript, Spring Boot, PostgreSQL, JWT, TomTom API*

- Built a full-stack transit platform with address-based trip planning, interactive route mapping, spending insights, and an **AI assistant** that compares routes and explains fare decisions
- Engineered a **pay-by-stop fare engine** across **100+ transit stops**, modeling **6+ fare conditions** including transfers, discounts, fare caps, disruptions, and early exits

LEADERSHIP EXPERIENCE

ColorStack - Community Member & Fellow

Aug. 2026 - Present

Sponsors for Educational Opportunity (SEO) - Tech Developer & Edge Fellow

Jun. 2026 - Present

Break Through Tech (Cornell Tech) - AI/ML Fellow

Mar. 2026 - Present

Society of Hispanic Professional Engineers (SHPE) - Pre-College Committee Officer

Nov. 2025 - Present
